OUR COMPANY

40 years of passion for quality automations

The history of **Proteco** established in the early seventies coming from a significant profession tradition and proceeding on to a relevant expansion through key experimentations at its plants of Castagnito, in Piedmont, Italy.

Here are concentrated the most advanced technologies of the sector which have been leading to a steady focused improvement of product conception and manufacture engineering, as well as the creation of a primary sales division committed both to the domestic and international market.

Day after day, beside the distributors, installers and end users, **Proteco** grew developing technological advanced functional solutions offering a more and more complete range of systems for gates, garage doors, parking areas, suitable to residential and public applications.

From the very beginning we have believed in export markets potential and we have been investing our resources in promoting **Proteco** brand an Italian manufacturing quality in Europe and overseas.

A rewarding career testified by a persistent financial progress along the years, it's the result of a responsible methodical policy.

A vocation which promoted and sustained our Popularity in the world as synonym of professional safety and proved know-how.

OUR MISSION

Reliability and innovation always beside you. Definitely.

We have a soft spot for things well done.

We love to create safe systems, designed to last, to be used with confidence and ease, requiring as little maintenance as possible and that can best meet the needs of installers and end customers.

That's why we constantly work to seek for new solutions and improve those that already exist.

In times when needs and the market of home automation itself do change, we are evolving our image, adapting our services consequently, trying to anticipate their requests.

Because we want to be a professional and reliable reference point for our customers.
A serious partner always beside you.

Because your success is our success. Definitely.

SAFETY

All PROTECO's systems do comply with the current safety standards in the respect of the European Directives on Electromagnetic Compatibility, Low Tension, Machines Directive and R&TTE.

RTT&E
1995/5/CE

EN 60950-1
EN 301 489-1
EN 301 489-3

EN 12445
EN 13241-1

Our systems are regularly tested on a sample basis all production and assembly steps long by our internal Quality Control. Additionally, once assembled, each single operator is powered and tested one by one for the final check.

Products certifications are further validated by tests performed by a certifying authority with international recognition.

Made in Italy AROUND THE WORLD

Since its first steps, Protoco showed an international vocation.

Today we are present in over 60 countries worldwide, with different business formulas tailored on each single market.

In some countries we have signed distribution agreements with established partners.

In other cases, we have chosen to become capital sharers of existing organizations to ensure the best possible distribution of our products.

Our research of partners doesn't stop and the penetration of the market is still growing. The desire to offer a more and more professional qualitative service led us in some cases to create even local branches.

Swing gates automation

Proteco knows that not all gates are the same.

The company's knowledge and experience led to the development of a complete range of reliable motors able to fit into a wide variety of installations.

The customer can safely choose between ten different versions of rams, or the precise movement of an articulated arm motor or perhaps the elegance of an underground system.

Proteco is the only manufacturer, in the home automation market, able to present a complete range of wheel-driven motors for swing gates; an innovative solution that combines brilliant design and technology with high versatility and user friendliness.

All Proteco models are available in several versions, to meet different voltage and installation requirements.

ACE TI

Electromechanical slimline extending ram for swing gates up to 3 m.

POWER AND SAFETY

The slim compact design perfectly suits the aesthetics of either modern or traditional gates.

Presented in strong aluminium powder coated frame; bevel gear pair transmission system manufactured in bronze.

Complete with practical reliable release system for manual operation in the event of power cuts - safely secured by a key lock.

The electronic controller features: LED display screen for ease of programming and fault diagnosing, adjustable deceleration times of the motors, adjustable Pedestrian Opening feature, adjustable motor working times for custom opening angles.

The 24Vdc version boasts built-in obstacle detection in compliance with the new Machine Directives ensuring this system is safe for use in various applications. In addition, the automation can be powered by a solar panel or back up batteries for continued operation in the event of power cuts.

Wheel-driven electromechanical opener for swing gates.

INNOVATION AND SIMPLICITY

Quick, simple installation on the leaf edge pushes and pulls the gate to an unlimited opening angle.

An ideal solution for automating long light leaf gates or where the pillar dimensions restrict the range of automation applicable.

Also, outward opening gates can be automated.

The automation is suitable for driveways and walkways with smooth compact surface. Due to the design of the motors fixing bracket, it can move up and down to 20 cm difference in height or inclination of the driveway slope.

Available in locked version (230v or 24V) or reversible version (230V).

Discrete automation ideal to enhance the aesthetic of prestige and modern construction gates.

The electronic controller features: LED display screen for ease of programming and fault diagnosing, adjustable deceleration times of the motors, adjustable Pedestrian Opening feature, adjustable motor working times for custom opening angles.

Sliding Gate Automation

The successful families of gear motors for sliding gates constitute Proteco's core production. The high performance, sturdiness and capability of these motors, result from years of experience and passion, underpinned by the choice of superior metals in the motor construction.

Control unit is embedded inside, providing a safe protection from cold and dust, and at the same time, an easy access to programming.

Low voltage models are enhanced by the provision of a back-up battery allowing continued operation during a power-cut.

New Mag models feature the electromagnetic detection of the limit brackets, assuring elegance, quietness and maximum reliability in all kinds of weather conditions.

MOVER

Sliding gate automation for rack-driven gates up to 1500 Kg, for residential and community use.

RELIABLE, SIMPLE, VERSATILE

Aluminium casting, bronze gear transmission system for a long lasting life. Very quick and simple release system.

Reduced dimensions make the installation suitable even with limited space for installation.

Ground plate adjustable in height for an accurate and simple installation.

MAG models available - fitted with a magnetic limit switch system in order to facilitate the operation under special weather or installation conditions.

Sliding gate automation for chain-driven gates up to 800 Kg.

PRACTICAL, COMPLETE

Chain driven automation, the ideal solution for those existing gates whose mechanical conditions limit the use of the traditional toothed rack.

Installation is even quicker and easier.

Precise chain tightening to allow perfect installation which safeguards the aesthetics of the gate.

Motor prewired control unit featuring adjustments of the motor deceleration times, adjustments of pedestrian opening feature and adjustments of motor working times.

LIBRA

Opener for sectional or spring-balanced garage doors up to 12m² wide and 100Kg of weight.

EASY COMFORT

Irreversible 24V motor for residential garage doors complete with embedded control unit and encoder-type limit switch system.

Quick and easy programming thanks to the keypad and display screen visible on the motor's cover.

Control board features: automatic programming of the working times, soft-start and soft-stop for efficient noise reduction, anti-crushing system with adjustable obstacle detection and automatic closing functions and alert for when garage door is left open.

Emergency release system from inside the garage in the event of power failure.

Suitable for light to heavy use, the LIBRA is available in two versions and can be installed on counterweights balanced garage doors using the optional adapter.

POWER AND RELIABILITY

24V garage door automation, complete with embedded control unit, courtesy light and adjustable mechanical limit switches.

The remote control radio receiver is supplied within its own case with an aerial so it can be installed outside the garage to maximize the radio range. The automation is quiet and reliable day after day thanks to the soft-start and soft-stop function.

An optional flashing light can be installed to the system to signal the door movement.

Maximum safety: in case of power failure the door can be manually opened from inside as well as from outside the garage thanks to an external release system included within the kit.

Suitable also for intensive use, the RALLYE can be fitted counterweight-balanced garage doors using the optional adapter.

230V opener for spring-balanced garage doors up to 8 m² wide.

PROFESSIONAL AND VERSATILE

Adjustable electromechanical limit switch system. Embedded control unit with built-in radio receiver, featuring adjustment of motor torque, adjustment of the deceleration times and fault warnings.

Easy to install: the kit includes the fixing bar on the door. Safety and security: the irreversible motor ensures that the door will remain closed even without any lock installed.

Built-in flashing light for warning when automation is in progress and emergency release system for the automation from the inside of the door to be used in cases of a power failure.

In situations where there is a pre-existing door-lock, an emergency opening system from the outside is available as an optional accessory.

Rolling Shutter Automation

Selection Guide

UNIVERSAL

Model	Description
Universal	Gear motor reversible max 170 Kg
Universal B	Gear motor with electro-brake max 170 Kg
Universal B/2M	Gear double motor with electro-brake - max 320 Kg

Rolling shutter automation for residential and industrial use.

RELIABILITY AND SIMPLICITY

The UNIVERSAL system represents the perfect solution to automate existing and new construction shutters.

Available in reversible version or locked, with electro-brake and manual release system.

Integrated electromechanical limit switches allow a precise adjustment for both opening and closing positions.

Modular adaptors included with the kit make the installation quick and easy: UNIVERSAL motors can fit drive shafts of 60 mm or 48mm and spring holders of 200 mm or 220 mm.

A double motor version is available for bigger built frames-up to 320 Kg weight.

G110
Rounded aluminium boom \varnothing 80mm (with reflectors and caps), length 6 m

G111
Rounded aluminium boom \varnothing 80mm (with reflectors and caps), length 4 m

G112
Rounded aluminium boom \varnothing 80mm (with reflectors and caps), length 3 m

G113
Moving support for rounded boom

BARRY

Barrier gate automation up to 6 m.

RELIABLE AND COMPLETE

Manufactured steel body with powder coated finish with LED lighting system and blinker warning light on board.

Double limit switching (mechanical and electromagnetic) with balance spring system adjustable according to the length of the boom.

Hand grip handle for quick and easy manual release, protected by an access cover which is opened via cut key.

Complete with telescopic boom, ideal to automate openings from 3 to 6 m.

Available versions: left and right hand opening, articulated boom system for parking areas or low ceilings.

Suitable for both residential and intensive use, it is available for 230V (fan-assisted motor) and 24V applications.

TECHNICAL SPECIFICATIONS

	BARRY DC	BARRY
Power Supply	230V ~ 50Hz	230V ~ 50Hz
Motor Power Supply	24V dc	220V ac
Current	0,5 - 3,3A	0,7 - 1A
Motor Power	80W	90W
Class IP Protection	44	44
Opening Speed	6"	6"
Telescopic boom	3,6 - 6 m	3,6 - 6 m
Cycles/hour (max)	250	200
Duty Cycle	intensive use	intensive use

INSTALLATION OVERVIEW

Barry	230V	6"	3 m a 6 m
Barry DC	24V	6"	3 m a 6 m

Control units

Proteco is leader in the engineering of control units thus enabling the installer to customize all kinds of gate system to meet most end user's requirements, with simple programming from the easiest to the more sophisticated installations.

The control units allow, amongst other functions, the customization of pedestrian opening times, the independent setting of each gate leaf's deceleration and the delay adjustment both in opening and in closing. The built-in display assures fine tuning of all the settings and a prompt user feed-back in the case of incorrect connection of motors or safety devices.

Control units

Swing gates

Q56

Control unit for SINGLE/DOUBLE SWING GATE 12V-24Vdc

- Easy programming with automating setting of working times, deceleration and delay between leafs.
- Multi-level amperometric obstacle detection.
- Operation modes: standard automatic closing, multi-users mode, step-by-step operation.
- Single leaf opening for pedestrian crossing.
- Built-in radio receiver module 433,92MHz (50 codes).
- Set up for powering by a solar panel or back-up batteries.

Q56AD	Control unit for double/single swing gate complete with installation box PAR04	230V-12V
Q56CD	Control unit for double/single swing gate complete with installation box PAR04	230V-24V
Q56DD	Control unit for double/single swing gate complete with installation box PAR04	115V-24V

MELO3	Electric lock interface module for 12V-15W for Q56 units
--------------	--

PAR04

PAR04	Installation box for control unit series: Q80A, Q60A, Q56
--------------	--

Control units

Swing gates

Q80A

Control unit for SINGLE/DOUBLE SWING GATE 230Vac

Multi-function control unit with LED display screen for programming and fault diagnosis.

- Custom adjustment of working and deceleration times for each motor.
- Automatic programming, with amperometric obstacle detection, or sequential programming with custom adjustment of power and deceleration for each motor.
- "Quick automatic closing" function.
- Single leaf opening for pedestrian crossing.
- Electronic adjustment of opening and closing delay between leaves.
- Multi-users function (opening priority)
- Pre-blinking, reversing stroke and lock pulse for electric-lock
- Built-in radio receiver module 433,92MHz (64 codes)
- Input for 8K2 type safety edge.

Q80A1D	Control unit for double/single swing gate complete with installation box PAR04	230V~50Hz
Q80A2D	Control unit for double/single swing gate complete with installation box PAR04	115V~60Hz

MEL04	Electric lock interface module for 12V-15W for Q80A units
--------------	---

MRX01	Aux - 2nd radio channel module for Q80 units
--------------	--

Q60AR

Control unit for SINGLE/DOUBLE SWING GATE 230Vac

Multi-function control unit with LED display screen for programming and fault diagnosis.

- Sequential programming with electronic adjustment of working and deceleration times for each motor.
- Operation modes: standard automatic closing, multi-users mode, step-by-step operation.
- Single leaf opening for pedestrian crossing.
- Electronic adjustment of deceleration and opening/closing delay between leaves.
- Pre-blinking, reversing stroke and lock pulse for electric-lock
- Pre-wired radio receiver module 433,92MHz (50 codes)
- Input for connection to a timer clock

Q60ARD	Control unit for double/single swing gate complete with installation box PAR04	230V~50Hz
---------------	--	-----------

MEL01	Electric lock interface module for 12V-15W for Q60A units
--------------	---

Control units

Sliding gates

Q26

Control unit for SLIDING GATES 12V-24Vdc

- Easy programming with automating setting of working and deceleration time.
- Multi-level amperometric obstacle detection.
- Operation modes: standard automatic closing, multi-users mode, step-by-step operation.
- Partial opening for pedestrian crossing.
- Built-in radio receiver module 433,92MHz (50 codes).
- Set up for powering by a solar panel or back-up batteries.

Q26	Control unit for sliding gate	230V-12V
Q26C	Control unit for sliding gate	230V-24V

Q38 A

Control unit for SLIDING GATES 380V

Multi-function control unit for triphase sliding gate for industrial use.

- Automatic closing function.
- Step-by-step operation or multi-users mode with opening priority.
- Photocells inputs.
- Complete with module for blinker's flashing light .

Q38A	Control unit for sliding gate	380V
------	-------------------------------	------

Rolling Shutters and interior blinds

Q45

Control unit for central motors for ROLLING SHUTTERS 230Vac

- Adjustable pause time for automatic closing
- Built-in radio receiver 433,92MHz
- Adjustable working time.
- Input for photocells and safety edges
- Output for safety flashing light
- It can be connected to a timer-clock for pre-set time opening and closing

Q45	Control unit for rolling shutters with box	230V
-----	--	------

Control units

Sliding gates

Q80S

Control unit for SLIDING GATES 230Va

Multi-function control unit with LED display screen for programming and fault diagnosis.

- Custom adjustment of working and deceleration times.
- Automatic programming, with amperometric obstacle detection, or sequential programming with custom adjustment of motor power and deceleration.
- "Quick automatic closing" function.
- Partial opening for pedestrian crossing.
- Multi-users function (opening priority)
- Inputs for opening and closing limit switches
- Built-in radio receiver module 433,92MHz (64 codes)
- Input for 8K2 type safety edge

Q80S	Control unit for sliding gate	230V~50Hz
Q80S2	Control unit for sliding gate	115V~60Hz

MRX01 Aux – 2nd radio channel module for Q80 units

Q60SR

Control unit for SLIDING GATES 230Vac

Multi-function control unit with LED display screen for programming and fault diagnosis.

- Sequential programming with electronic adjustment of working and deceleration times.
- Operation modes: standard automatic closing, multi-users mode, step-by-step operation.
- Pre-blinking and partial opening for pedestrian crossing.
- Inputs for opening and closing limit switches.
- Pre-wired radio receiver module 433,92MHz (50 codes)
- Input for connection to a timer clock

Q60SR	Control unit for swing gate	230V~50Hz

Radio systems

Radio receivers

Radio receiver for pillar/wall mounting, complete with case and aerial. Available in 1 or 3-channel version, frequency 433.92MHz.

RX 433 1 12/24V	One-channel radio receiver with case and aerial, 12/24V
RX 433 3 24V	Three-channel radio receiver with case and aerial, 24V

Aerial

Extension aerial 433.92MHz, complete with mounting bracket and 3.5 m coaxial wire. Can be added onto an existing system to increase standard radio range in case of low or disturbed radio signal.

PANT01	Bracket mounted aerial
---------------	------------------------

Radio transmitters

TX312 new

3-channel radio transmitter with randomly generated codes.
Radio frequency 433.92MHz.
It can clone existing radio code from others radio transmitters of the same series.
Soft-touch case.

TECHNICAL SPECIFICATIONS

Frequency	433,92 Mhz
Battery	12Vcc – 23A

TX312	3-channel radio transmitter Freq. 433.92MHz
TX312 R	Rolling code 3-channel radio transmitter Freq. 433.92MHz

Hit

3-channel radio transmitter with randomly generated codes.
Radio frequency 433.92MHz.
It can clone existing radio code from others radio transmitters of the same series.

TECHNICAL SPECIFICATIONS

Frequency	433,92 Mhz
Battery	12V cc

HIT 3	3-channel radio transmitter Freq. 433.92MHz
--------------	--

TX4334

4-channel radio transmitter with fixed radio codes.
Radio frequency 433.92MHz.
Code setting by dip-switches.

TECHNICAL SPECIFICATIONS

Frequency	433,92 Mhz
Battery	12V cc

TX4334	4-channel radio transmitter with dip-switches Freq. 433.92MHz
---------------	--

Control Systems

Key-switches

RS15/RS16

Key-switch control with one or two micro-switches.
Suitable for encasing or wall-mounting.

RS15	One micro Key-switch
RS16	Two micro Key-switch

RS10

Iron post, dark grey painted, for RS15 and RS16 key-switches.
Height 110cm.

RS10	Post for RS15 and RS16 key-switch
-------------	---

Keypads

RT35

Anti-vandalism keypad with stainless steel case.
60 codes memory.
Two output relays: 1A and 5A.
Power supply: 12V-24Vac/dc.

RT35 Inox case keypad

RT36

Polycarbonated keypad with backlight.
60 codes memory.
Two output relays: 1A and 5A.
Power supply: 12V-24Vac/dc.

RT36 Polycarbonated keypad

RT37

Multifunction wireless key-pad 433Mhz.
Night light and acoustic buzzer.
Protection class IP 65.
Lithium batteries power supply.

RT37 Wireless keypad 433Mhz

Loop detectors

RT05

One-way magnetic loop detector for vehicles.
Output relay with double contact (way-in and presence detection).
Possible series connection of two magnetic loops.
Self-calibrating feature with manual re-calibration in case of disturbs.
Dip-switches programming.
Power supply 12V-24Vac/dc.

RT05 Magnetic loop detector

Safety Systems

Blinker Lights

RL11T

Flashing light 24V (2x10W lamps).

RL11T 24V Flashing Light

Photocells

RF36

Safety infra-red photocells set.
They can be mounted on a wall, on a pillar or on RF11 photocells post.
Power supply 12V-24Vac/dc.

RF36 Safety photocells set

RF11

Iron post, dark grey painted, for RF36 photocells.
Height 55cm.

RF11 Post for **RF 36** photocells

RF02

Safety infra-red pivot photocells set
Suitable for wall recessed mounting or on RF11 photocells post.
Power supply 12V-24Vac/dc.

RF02 Safety photocells set for flush-mounting

RF05

Iron post, dark grey painted, for RF03 photocells.
Height 60cm.

RF05 Post for **RF02** photocells

RF33

Wireless safety photocells set, with wireless transmitter and wired receiver.
Input for safety edge connection.
90° pivot mounting.
Power supply 12V-24Vac/dc.
Battery included.

RF33 Wireless safety photocells set

Safety edges

RC22

Mechanical sensitive edge for garage doors and road barriers.

Aluminium frame and 25 mm high rubber profile.
Complete with sensor and 2,50 m wire.

RC22 Safety edge - 2,50 m length

RC23

Mechanical sensitive edge for swing gates or sliding gates.

Three safety micro-switches.

2-wires fail safe cable with 8K2 Ohm resistance.
Aluminium frame and 60 mm high rubber profile.
Complete with sensor and 2,00 m wire.

RC23 Safety edge - 2,00 m length

Electro-locks

RT16

12V electric lock for single swing gates. Suitable for horizontal use on left hand or right hand applications.

RT16 Multiple electro-lock

RT18

Vertical 12V electric lock for double swing gates. Complete with ground keep plate.

RT18 Vertical electric lock

Accessories

Batteries

Q BAT 1,2

Back-up battery 12Vdc, 1,2 Ah.
Key-switch control with one or two micros. Suitable for encasing or wall-mounting.

Q BAT 1,2 Sealed battery 12V - 1,2 Ah

Proteco's General Conditions of Sale

1. PREAMBLE:

1.1 The present General Conditions of Sale, having as subject all kind of products supplied by Proteco S.r.l., shall regulate all present and future contracts of sale between Proteco S.r.l. and the Purchaser provided that the Purchaser has its registered office outside Italy. Any modification or deviation from the present general conditions of sale shall be made in writing.

2. ORDERS:

2.1 The purchase orders collected by Proteco S.r.l. or by his agents and/or commercial intermediaries became binding only at the moment when the Purchaser receives the written order confirmation of Proteco S.r.l..

2.2 The forwarding of an order by the Purchaser as well as his acceptance of an offer, however effected, shall involve his adhesion to the present General Conditions of Sale.

3. CONFORMITY OF THE PRODUCTS :

3.1 Proteco S.r.l. represents that the products are in compliance with E.C. Directives, Regulations and Italian technical rules applicable to the products including those regarding safety and pollution.

Proteco S.r.l. does not guarantee the compliance of the products with the laws and technical rules in force in the Purchaser's country.

3.2 Any other data or parameter indicated in Proteco's advertising, commercial documents or other Proteco's documents of sale or deducible from the samples delivered by the Proteco S.r.l. will constitute only an approximate guide and they do not represent, in any case, a parameter for an evaluation of the compliance of the products.

4. PRICES AND PAYMENT:

4.1 The prices are those indicated in the Proteco's price list as in force from time to time.

They are expressed in Euro and they are intended exclusive from any national and foreign taxes and duties.

Any special characteristics, options, modifications required by the Purchaser shall be charged separately and added to the price list.

4.2 Unless differently agreed payments shall be made by means of bank transfer in advance, before delivery date, into the bank account indicated by the Proteco S.r.l. or by means of an irrevocable letter of credit to be confirmed by an Italian leading bank, cashable at sight against shipping documents, according to the text and characteristics required by the Proteco S.r.l..

4.3 In case of late payment Proteco S.r.l. may, after having notified the Purchaser in writing, suspend his performance of the contract until he receives payment or adequate banking guarantees covering the whole outstanding debt.

5. RESERVATION OF TITLE:

5.1 The Products shall remain the property of Proteco S.r.l. until paid for in full.

6. DELIVERY:

6.1 Unless differently agreed the delivery of the products shall be made FCA Proteco warehouse in accordance with International Chamber of Commerce Incoterms Revision 2010 which shall be deemed incorporated by reference into these General Conditions of Sale.

6.2 In case it is agreed that the shipment (or part of it) will be effected by Proteco S.r.l., this latter shall act as agent of the Purchaser being agreed that the shipment shall be done at the whole risk and charge of the Purchaser. Partial deliveries are allowed.

6.3 The delivery date shall be indicated under the Proteco's order confirmation.

In any case, Proteco S.r.l. is entitled a period of grace of 30 working days as of the expiry of the delivery date provided for in the order confirmation.

Expired the aforesaid term of grace the Proteco S.r.l. shall pay Purchaser a lump sum of 0,2% of the price of the Products delayed for each full week of delay as compensation for the damages caused by the delay up to the maximum limit of 2% of the price of the products subject of delayed delivery.

Any further compensation for damages suffered by the Purchaser in consequence of the delayed delivery is excluded.

7. GUARANTEE:

7.1 Subject to conditions hereinafter set out, Proteco S.r.l. shall remedy any defect of the products resulting from faulty design, materials or workmanship. The present undertaking is limited to those defects which appear within a period of 36 months for the mechanical components or 24 months for the electronic components from the date of production printed on each product.

All the guarantees provided for hereinafter are conditional on compliance with the operating and maintenance instructions supplied by Proteco S.r.l..

The Purchaser shall notify in writing, by means of registered mail, of any defect within 10 working days from its discovery.

Lacking this the purchaser will lose its right to have the defect remedied according to this guarantee.

Upon receipt of such notice, the obligation of Proteco S.r.l. under this guarantee is limited to, at Proteco's choice, and subject to prior examination of the defective products to be sent at Purchaser's risk and expenses:

i) Replace the defective products, ii) repair them or iii) issue a statement of credit for the amount corresponding to the products found defective.

Proteco S.r.l. is not liable for defects caused by faulty assembling or maintenance of the products by the Purchaser or due to non compliance to the instructions for assembling, nor for defects caused by alterations carried out without Proteco's written consent.

The present guarantee provided hereinabove absorbs and supersedes any other legal, statutory or contractual guarantee.

The Purchaser, in particular, shall have no right to claim damages, included loss of production, loss of profit, loss of use, loss of contracts or for any consequential, economic or indirect loss whatsoever, reduction of price or resolution of the contracts.

8. PRODUCT'S LIABILITY:

8.1 If Proteco S.r.l. incurs liability towards any third parties for product's liability he will be responsible only within the limit of amount and within the terms and conditions of his Product's liability insurance coverage.

9. GOVERNING LAW:

9.1 All the sale contracts concluded by parties shall be governed by the present general sale conditions and, to the extent that such questions are not covered by the present general sale conditions, by United Nations Convention on Contracts for the International Sale of Goods (Vienna Convention of 1980, hereafter referred to as «CISG»), and, to the extent that such questions are not covered by CISG, by Italian law.

10. DISPUTES RESOLUTION:

10.1 In case the Purchaser has its registered office in the territory of the European Union for any disputes arising out of or in connection with this contract the courts of Turin in Italy shall have exclusive jurisdiction; where the Purchaser has its registered office outside the territory of the European Union any disputes arising out of or in connection with this contract shall be settled by Arbitration in conformity with the Rules of the Piedmont Arbitral Chamber (see at <http://images.pie.camcom.it/f/Varie/RU/RULES2006.pdf>) by one arbitrator designed in accordance to said rules.

The parties undertake to comply with the arbitrator's award.
